Profile

Software Engineer with 4 years of experience building production systems in .NET and Angular. Migrated legacy VB applications to modern ASP.NET Core and Angular stacks across three enterprise projects, from architecture to deployment, and improved application performance by roughly 25%. Currently pursuing an M.Sc. in Artificial Intelligence in Berlin, focused on machine learning, NLP, computer vision, and robotics. Open to Software Engineering, AI Engineering, and Full Stack roles.

Experience

Software Engineer — Global ESoftSys

Aug 2023 – Feb 2026 · Mangaluru, India

- Migrated legacy VB applications to ASP.NET Core and Angular across Booth Tracker Cloud, Mobil Rentals, and Antiquesoft.
- Contributed to 3 major enterprise projects, from initial development through production deployment.
- Improved application performance by ~25% through optimized architecture and database handling.
- Designed and integrated RESTful APIs using Entity Framework.
- Delivered consistently in Agile/Scrum teams with high on-time delivery.

Software Engineer — Raasoft Infotech

Feb 2022 – Jul 2023 · Mangaluru, India

- Maintained and enhanced ERP functionality (RaasERP) for multiple clients: production, attendance, payroll, and reporting modules.
- Built new client-specific applications on a shared architecture for consistency and faster delivery.
- Implemented scalable features using ASP.NET Core, AngularJS, and LINQ.
- Conducted code reviews and applied best practices to improve maintainability.

Software Developer Intern — Siona Solutions

Oct 2021 – Feb 2022 · Mangaluru, India

- Built StudentConnect, a student portal for St. Aloysius College, in PHP and Laravel, including a digital library module, annotations, and data import/export.
- Implemented backend functionality and database integration for core features.
- Resolved bugs and addressed security vulnerabilities, improving system stability.

Selected Projects

Booth Tracker Cloud — Space rental and vendor management platform for flea markets and swap meets. Built an architecture proof-of-concept, dynamic graphical layouts for real-time booth allocation, and REST APIs on SQL Server. ASP.NET Core, Angular, TypeScript, Entity Framework, Azure DevOps, Syncfusion

Flowdesk — FlowDesk is a Workforce Operations & Smart Scheduling Platform built as a practical software architecture laboratory with .Net + Angular + PostgreSQL.

Space Shooter — Browser game built with Angular. space-shooter-ng.onrender.com

Skills

Languages	C#, JavaScript, TypeScript, Python, PHP
Frontend	Angular, AngularJS, HTML/CSS
Backend	ASP.NET Core, REST APIs, Entity Framework, LINQ, Laravel, Flask/Django
Databases	SQL Server, MySQL
Cloud & DevOps	Microsoft Azure, Azure DevOps, Git/TFS
AI & ML (in progress)	Python for ML, Computer Vision (OpenCV), NLP, applied ML models

Education

M.Sc. Artificial Intelligence — Berlin School of Business and Innovation	May 2026 – Present
Machine Learning, NLP, Robotics, Automation, Computer Vision	
Bachelor of Computer Applications — St. Raymond's Degree College	2017 – 2020
Software Development, Web Technologies, Database Systems	

Certifications

Python Development Workshop — Codelab
Systems / Cognitive Solutions, Oct 2020 –
Mar 2021
